OPERATIONS / STATE OF COMPANY'S AFFAIRS

The company returned to profitability in FY 17-18. Profit before tax was Rs 92 lakhs as compared to a loss of Rs 83 lakhs in the prior year. This was on account of the Company's strong performance in the third and fourth quarters of FY 17-18.

Overall, sales remained fairly stagnant compared to the prior year. Sales growth was impacted by sluggish sales in the first half of the year. Sales increased nearly 45% in the second half of the year as compared to the first half. The growth was due to strong market conditions in both export

and domestic markets and the Company's heightened marketing push in prior periods. Sales across all market segments witnessed significant increases.

The Company's cost reduction initiatives also boosted the bottom line.

The primary drivers for the Company's profitability are as follows:

- **Change in Sales Mix:** The Company is placing greater emphasis on export sales and sales to industrial customers which yield higher margins. The proportion of export sales and industrial sales relative to total sales increased substantially during the course of FY 17-18 as a result of the Company's focus. Consequently the proportion of sales to domestic OEM customers decreased.
- **Favourable Exchange Rate Movements:** The Company's exports are in Euro and GBP. Both these currencies strengthened during the year. Thus export realisations per unit sale increased as compared to the previous year. The company recognised a foreign exchange gain of Rs 69.55 lakhs for FY 17-18 as compared to a loss of Rs 28.96 lakhs during FY 16-17.
- **Reduction in Finance Costs:** Interest cost reduced from Rs 86.70 lakhs in FY 16-17 to Rs 48.56 lakhs in FY 17-18. This was due to better working capital utilization and a strengthened cash flow position on account of the improved financial performance of the Company.

However, the Company faced the following headwinds which had a negative impact on financial performance.

- **Increase in Steel Prices:** Domestic and global steel prices increased sharply over the course of the financial year. The Company's major raw material input is steel and the Company was compelled to pass on price increases to suppliers across the board. These were not fully compensated by customers or were compensated with delayed effect.
- **Increase in Employee Costs:** Employee benefits expense increased in the current financial year. This was on account of increments agreed to in the wage settlement with workmen and commensurate increments given to staff with a view to employee retention. The Company's employee cost is high relative to industry norms.

TRANSFER TO GENERAL RESERVES

There was no transfer made to General Reserve.

DIVIDEND

In view to conserve financial resources, the Board of Directors does not recommend any dividend for the financial year 2017-2018.

OUTLOOK

The outlook for both domestic and export markets remains positive for the Company's major customer segments – commercial vehicle, off-highway and agricultural. Additionally, the rupee is forecasted to remain weak during the financial year which will boost export margins.

The Company has stepped up its sales and marketing efforts. It is also expanding its product offering and targeting new customers. The Company is already beginning to see the results of its efforts in the prior year. However the gestation time for new customers to translate into increased sales is fairly long.

The company has also introduced a new line for the Indian aftermarket, XLO Value. The brand has been well received and the Company is expanding its product offering. This should translate into additional sales in the second half of the year.

However rising steel and fuel prices remain a negative headwind on profitability. The company is continuing its value engineering and continuous improvement efforts to reduce manufacturing costs and attempt to neutralize this effect. The company had also undertaken a huge cost reduction initiative to reduce costs across the board. While most costs have been reduced to the bare minimum, this initiative continues.

MATERIAL CHANGES AND COMMITMENTS AFTER THE END OF THE FINANCIAL YEAR:

There have been no material changes and commitments, affecting the financial position of the Company, which have occurred between the end of the financial year and the date of the report.

CHANGE OF NAME:

Pursuant to approval of the Members of the Company vide Special Resolution passed on June 15, 2018, and the approval of the Registrar of Companies, Mumbai on July 13, 2018, the name of the Company was changed from "Hindustan Hardy Spicer Limited" to "Hindustan Hardy Limited". MANAGEMENT DISCUSSION AND ANALYSIS

a. *Industry structure and developments.*

Sales are primarily to 4 customer segments – domestic OEMs, export customers, industrial customers and aftermarket (both to OEMs and to dealers and distributors). In FY 17-18, the Company's largest market segment was export, followed by domestic OEMs, industrial customers and the aftermarket.

b. *Opportunities and Threats.*

The Indian propeller shaft market is dominated by 4 major players who all jostle for market share amongst the major commercial vehicle manufacturers, the differentiating factor being price competitiveness. As a result, margins are shrinking.

The after-sale market is also crowded by a number of low cost suppliers supplying unbranded generic components at low prices. The Company was a late entrant to the after sales market and is yet to achieve the brand recognition that can command a significant price premium.

However, the Indian market is growing rapidly in all industries which the Company serves – commercial vehicles, agriculture and off-highway. A large part of this is due to the strong thrust given by the government to infrastructure development.

In the export market, Indian manufacturers have a cost advantage compared to their European and American counterparts. However quality standards are very stringent and monetary penalties for rejections or product failures is very high. Export to the US and Europe has significant potential – however the possibility of a global trade war poses a significant threat. Despite this, the ongoing trade conflict between the US and China could prove to be a golden opportunity for Indian manufacturers.

Several foreign players in India are taking steps to indigenize components that were previously imported which provides an attractive opportunity to Indian manufacturers. They are also looking to India for global sourcing as the capabilities and quality standards of Indian manufacturers have improved considerably.

c. *Segment-wise or product-wise performance.*

The company operates in a single segment.

Total revenue from operations in FY 17-18 was Rs. 3833.54 Lakh as compared to 3930.14 Lakh in FY 16-17.

Domestic sales decreased during the year due to sluggish sales in the first half of the

year. Sales to industrial and off-highway customers increased due to strong growth in the construction equipment market. However OE sales and aftermarket sales decreased. Sales in the first half of the year were impacted by the lingering effects of demonetization and uncertainty around the transition to GST. Additionally, the commercial vehicle segment struggled with the transition to BS-IV emission norms as they were left with sizeable inventory of vehicles which they had to convert to meet the new norms leading to a slowdown in production in the first two quarters.

Export sales increased substantially in FY 17-18. This was on account of improvement in the European economy and the global agricultural market. The stronger euro also boosted sales realization in rupee terms.

d. Outlook

The outlook for the domestic and export markets remains positive for the Company's major customer segments – commercial vehicle, off-highway and agricultural. Additionally, the rupee is forecasted to remain weak during the financial year which will boost export margins.

The Company has stepped up its sales and marketing efforts. It is also expanding its product offering and targeting new customers. The Company is already beginning to see the results of its efforts in the prior year. However the gestation time for new customers to translate into increased sales is fairly long.

The company has also introduced a new line for the Indian aftermarket. The brand has been well received and the Company is expanding its product offering. This should translate into increased sales in the second half of the year.

e. Risks and concerns.

Rising steel and fuel prices remain a negative headwind on profitability. The company is continuing its value engineering and continuous improvement efforts in an attempt to reduce manufacturing costs and neutralize this effect. The company had also undertaken a huge cost reduction initiative to reduce costs across the board. Most costs have been reduced to the bare minimum; however this initiative continues

Increasing competition and rising costs are also putting downward pressure on margins. The Company is trying to counter this by focusing on operational efficiencies.

The Company is trying to penetrate new export markets; however the possibility of a global trade war poses a threat.

f. Internal control systems and their adequacy.

The adequacy of control systems is reviewed on a monthly basis by the management and assessed quarterly by the internal auditor and the Board.

The internal control systems in place are more than adequate.

g. Discussion on financial performance with respect to operational performance.

During FY 16-17 sales volume decreased drastically and exchange rates moved unfavourably resulting in a loss despite the considerable savings achieved by the various cost reduction initiatives. Management focused on increasing operational efficiencies which directly translated into improved margins. This helped limit the loss during the year.

During FY 17-18 sales grew marginally and raw material costs increased sharply; only a portion of which was compensated by customers. The Company's cost reduction initiatives bore fruit as the Company was profitable despite the rise in input costs.

Efforts to further improve efficiency continue at all levels and across all departments.

h. Material developments in Human Resources / Industrial Relations front, including number of people employed.

Total number of employees increased to 202 from 188 at the end of the prior financial year.

The labour agreement was settled during the year for a period of 4 years (1st April 2016 to 31st March 2020) with retrospective effect. This was a breakthrough agreement as it was the first agreement in which there was a component of wages that is linked to achieving certain productivity norms. Labour relations remain cordial and were so during the entire period of negotiations.

1. Corporate Information:

Hindustan Hardy Spicer Ltd. is a Public Limited Company listed on the Bombay Stock Exchange. It was incorporated on October 16, 1982 under the Companies Act, 1956. It is engaged in the business of designing and manufacturing of Propeller Shafts and other accessories required for automotive, industrial and other applications. The registered office of the Company is located at Nashik, Maharashtra, India.

2. Statement of compliance:

The financial statements have been prepared in accordance with Ind AS's notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended.

3. Basis of Preparation:

The financial statements for the year ended March 31, 2018 are the Company's first Ind AS financial Statements. The date of transition to Ind AS is April 1, 2016. Accordingly, the Company has prepared an Opening Ind AS Balance Sheet as on April 1, 2016 and comparative figures for the year ended March 31, 2017 are also in compliance with Ind AS. The Statement of Profit and Loss for the financial year ending March 31, 2017 has also been restated as per Ind AS.

The financial statements have been prepared on a historical cost basis, except for Defined benefit plans – which are measured as per actuarial valuation.

4. Significant Accounting Policies:

(a) Property, plant and equipment ; Capital work-in-progress & Intangible assets:

- (i) Property, plant and equipment & intangible assets are stated at their original cost of acquisition / installation (net of Cenvat , VAT , GST credit wherever applicable) net of accumulated depreciation, amortization and impairment losses. Subsequent expenditures are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost to the item can be measured reliably. All repairs and maintenance expenses on assets are charged to profit or loss during the reporting period in which they are incurred.
- (ii) Property, plant and equipment or intangible assets not ready for the intended use on the date of balance sheet are disclosed as "Capital work -in-progress". Advances given towards acquisition/construction of fixed assets outstanding at each Balance sheet date are shown under "Capital work-in-progress".

- (iii) An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognized.
- (iv) The residual values, useful lives and methods of depreciation of property, plant & equipment and intangible assets are reviewed in each financial year and adjusted prospectively, if appropriate.

(b) Depreciation:

(i) Tangible Assets:

- I. Depreciation on assets is provided on straight line method at the rates and in the manner prescribed in Schedule II to the Companies Act, 2013.
- II. Depreciation on additions to Property, plant & equipment and intangible assets is provided on a pro-rata basis from the date of acquisition or installation, and in the case of a new project, from the date of commencement of commercial production.
- III. Depreciation on assets sold, discarded, demolished or scrapped is provided up to the date on which the said asset is sold, discarded, demolished or scrapped.

(ii) Intangible Assets:

- I. Intangible assets with finite lives are amortized on straight line method over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.
- II. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period.

Transition to Ind AS:

On transition to Ind AS, the Company has elected to continue with the carrying value of all of its Property, plant and equipment and Intangible assets recognised as at 1 April 2016 measured as per the previous IGAAP and use that carrying value as the deemed cost of respective assets.

Impairment of non-financial assets:

The carrying amounts of other non-financial assets are reviewed at each Balance Sheet date if there is any indication of impairment based on internal/

external factors. An impairment loss, if any is recognised in the statement of profit and loss wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets. A previously recognised impairment loss if any, is increased or reversed depending on the changes in circumstances, however the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation/amortization if there was no impairment.

(c) Inventories:

(i) Raw Materials / Components:

Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on First in First out (FIFO) basis.

(ii) Stores & Spare parts are valued at Cost.

(iii) Finished goods and Work in Progress:

Lower of cost and net realizable value. Cost is determined on absorption basis and include material, labour and production overheads. Material cost for the purpose of valuation is ascertained on First in First out (FIFO) basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

Cost includes all charges in bringing the goods to the point of sale, transit insurance and receiving charges. Work-in-progress and finished goods include appropriate proportion of overheads.

(d) Financial Instruments:

The presentation of financial instruments as per applicable Ind AS.

(e) Provisions and Contingencies:

A provision is recognised for a present obligation as a result of past events if it is probable that an outflow of resources will be required to settle the obligation and in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to its present value and are determined

based on best estimate of the amount required to settle the obligation at the Balance Sheet date. A contingent liability is disclosed, unless the possibility of an outflow of resources is remote.

(f) Foreign Currency Conversion:

The Company's financial statements are presented in Indian National Rupee (INR) which is also its functional currency.

Foreign currency transactions are recorded at the rates of exchange prevailing on the date of transaction or at the rates that closely approximate the rate at the date of the transaction.

Exchange differences arising on the settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or expenses in the year in which they arise.

(g) Revenue recognition:

- (i) Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made.
- (ii) The specific recognition criteria described below must also be met before revenue is recognised.

(iii) Sale of goods:

Revenue is recognized when the significant risks and rewards of ownership of the goods have passed to the buyer which generally coincides with the delivery of goods to customers.. Accordingly, domestic sales are accounted on dispatch of products to customers and Export sales are accounted on the basis of date of bill of lading / delivery terms . Warranty claims are accounted for on the basis of settlement of the same.

The Government of India introduced the Goods and Service tax (GST) with effect from 1st July 2017. GST is collected on behalf of the Government and no economic benefit flows to the entity and does not result in an increase in equity, consequently revenue is presented net of GST. Sales of earlier period included excise duty which now is subsumed in GST. The twelve months period ended on 31st March, 2017 and the current period sales upto 30th June 2017 includes excise duty.

Revenue disclosed is inclusive of excise duty and net of sales tax / value added tax / GST, discounts and sales returns, as applicable.

(iv) Rendering of services:

Revenue from services is recognised (net of service tax / GST , as applicable) pro-rata over the period of the contract as and when services are rendered.

(v) Duty Drawback / MEIS – Export Incentives:

Export incentives are accounted for on realization basis as there is uncertainty about the actual amount to be realized after due compliances of all the conditions.

(vi) Interest income:

Interest income is recognized on a time proportion basis that reflects the effective yield on the asset.

(h) Retirement and other employee benefits:**(i) Defined Contribution Plan:**

Employee benefits in the form of contribution to Provident Fund managed by Government Authorities, Employees State Insurance Corporation and Labour Welfare Fund are considered as defined contribution plan and the same is charged to the Statement of Profit and Loss for the year in which the employee renders the related service

(ii) Defined Benefit Plan:

Retirement benefit in the form of Gratuity, is considered as defined benefit obligation and is provided for on the basis of actuarial valuation as at the date of Balance Sheet. Re-measurement, comprising of Actuarial gain / loss, if any, is immediately recognised in Other Comprehensive Income (OCI) under retained earnings. The same is not reclassified to Statement of Profit and Loss. Prior year comparisons are treated accordingly. Earlier in IGAAP Actuarial gain/loss were recognized under Employee benefit expenses.

The company has taken a Group Gratuity-cum-Life Assurance Scheme Policy from Life Insurance Corporation of India for future payment of gratuity to retiring employees. The balance lying with LIC of India in this policy is compared with the liability as calculated in actuarial valuation report. Any shortfall in the same is recognized as liability and any surplus is shown as asset.

Provision for Leave Encashment is made on actual basis on the assumption that the same would be payable at the end of the accounting period – if all the employees were to terminate their services.

The company also contributes certain percentage of salary for all eligible employees in managerial cadre towards Superannuation Fund managed by approved trust / Life Insurance Corporation of India.

(i) Borrowing Costs:

Borrowing cost directly attributable to acquisition and construction of assets that necessarily takes substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of such assets up to the date when such assets are ready for intended use or sale. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

(j) Taxation:

Tax expense comprises of current income tax and deferred income tax and includes any adjustments related to past periods in current and / or deferred tax adjustments that may become necessary due to certain developments or reviews during the relevant period.

Current income tax

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961.

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised outside profit or loss are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets / liabilities are reviewed at each Balance Sheet date. The Company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain that sufficient future taxable income will be available.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the assets realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

(k) Leases:

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Company as a lessee:

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

(l) Segment Reporting:

Operating segment is reported in a manner consistent with the internal reporting provided to chief operating decision makers.

The board of directors of the company has appointed Management team which has been identified as being the chief operating decision maker, consists of Chief Executive Officer (CEO), Chief Finance Officer (CFO), Production Manager, Sales & Marketing Manager and Design Manager. They assess the financial performance and position of the Company and make strategic decisions.

(m) Earnings Per Share:

Basic earnings per share is calculated by dividing the net profit or loss for the period from continuing operations attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period from continuing operations attributable to equity shareholders is divided by the weighted average number of equity shares outstanding during the period - adjusted for the effects of all dilutive potential equity shares.

(n) Classification of Current/Non-Current Assets and Liabilities:

All assets and liabilities are presented as Current or Non-Current as per the Company's normal operating cycle and other criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization, the Company has ascertained its operating cycle as 12 months for the purpose of Current / Non-current classification of assets and liabilities.

(o) Significant estimates and assumptions:

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(p) Classification of Legal matters and Tax litigations:

The litigations and claims to which the Company is exposed are assessed by management with assistance and support of external specialized lawyers. Disclosures related to such provisions, as well as contingent liabilities, also require judgment and estimations if any.

All estimates mentioned above are further detailed in the corresponding disclosures.

(b) Defined Benefit Liabilities:

Both under IGAAP and Ind AS, the Company recognised costs related to its post-employment defined benefit plan on an actuarial basis. Under IGAAP, the entire cost, including actuarial gains and losses, are charged to Statement of Profit and Loss. Under Ind AS, remeasurements (comprising of actuarial gains and losses) are shown as Other Comprehensive Income (net of tax).

(c) Lease Premium:

Under IGAAP, Leasehold Land was shown as property. Consequently, amortization of premium on Leasehold Land was included in depreciation. Under Ind AS, Leasehold Land is not a part of Property.
